$C_3 \times C_3$: nine complete fuzzy-soft members

Every edge is an upward cover relation

Each node is a complete state

$\widetilde{x}_{ij} = \{(\lambda_1, \alpha_i), (\lambda_2, \beta_j)\}$

$(\alpha_1, \alpha_2, \alpha_3) = (.20, .50, .80)$

$(\beta_1, \beta_2, \beta_3) = (.30, .60, .90)$

Order and operations

$\widetilde{x}_{ij} \preceq \widetilde{x}_{k\ell} \iff i \leq k,\ j \leq \ell$

$\widetilde{x}_{ij} \vee \widetilde{x}_{k\ell} = \widetilde{x}_{\max(i,k),\max(j,\ell)}$

$\widetilde{x}_{ij} \wedge \widetilde{x}_{k\ell} = \widetilde{x}_{\min(i,k),\min(j,\ell)}$
